SUNEHA SAINI

POWER PLATFORM & REACT DEVELOPER

9914980908 | er.sunehasaini@gmail.com | linkedin.com/in/suneha-saini/ |Amritsar, Punjab, India | https://suneha-saini.vercel.app/

PROFESSIONAL SUMMARY

Software Developer with **1+ years of experience** in building scalable web and business applications using **Microsoft Power Platform, React.js, Node.js, and Python**. Experienced in developing responsive front-end interfaces, low-code enterprise solutions, and workflow automation using **Power Apps, Power Automate, and Dataverse**. Skilled in designing and integrating **REST APIs**, data processing pipelines, and business logic to create efficient and user-centric digital solutions.

Proficient in developing **end-to-end applications**, including Power Apps solutions, Power Pages portals, dashboards, and automation systems integrated with external services. Strong background in **UI/UX best practices, frontend engineering, and system integration**, with experience translating business requirements into scalable technical solutions.

Experienced working in **Agile/Scrum environments**, collaborating with cross-functional teams across the full software development lifecycle.

Familiar with **AI-driven workflows, prompt engineering, automation pipelines, and intelligent system development**.

TECHNICAL SKILLS

Programming Languages: JavaScript, HTML, CSS, Python, SQL
AI & Intelligent Automation: AI Agents, Prompt Engineering, LLM-based workflows, Automation Pipelines
Microsoft Power Platform: Power Apps (Canvas & Model-Driven), Power Automate, Dataverse, Power pages, Power BI
Frontend & UI Development: React.js, Tailwind CSS, Responsive Web Design, UI/UX Implementation
Development Tools & Platforms: Git, GitHub, Azure DevOps, Postman, Docker
API & System Integration: REST APIs, JSON, Backend integration, API-based Data Integration, Power Platform Integrations
Testing & Debugging: API Testing (Postman), Manual Testing, Debugging Tools
Microsoft Ecosystem Integration: Power BI, Microsoft 365, Dynamics 365
Analytical Skills: Data Visualization, Workflow Optimization
Soft Skills: Collaboration, Problem Solving, Time Management, Teamwork

EDUCATION

Bachelor of Technology | Computer Science Engineering | Khalsa College of Engineering & Technology, Amritsar | **2021-2025**
CGPA: 8.78

WORK EXPERIENCE

AOSC – MICROSOFT POWER PLATFORM & REACT DEVELOPER — FEB. 2025 – PRESENT

Power Apps & React Developer – UI Development, Automation & AI Integration

- Built responsive React interfaces tailored to client needs with dynamic API integration and data mapping.
- Developed reusable components and implemented logic for dashboards, forms, and result views.
- Worked on Python developing Backend for migration tools.
- Integrated AI-powered agents for tasks like PDF conversion, data extraction, and automation.
- Streamlined workflows using Power Apps and automated tasks via Power Automate.
- Created interactive interface and seamless API integration. Also developed several API with AI integration.

AOSC – Microsoft Power Platform Intern — July 2024 – Jan 2025

Power Apps for E2E transitions, process automation & sustainability tracking across sectors.

- Developed and deployed model-driven apps using Microsoft Power Apps to streamline organizational workflows and enhance productivity.

- Designed and implemented features such as leave requests, workflow approvals, task management, and productivity tracking within apps.
- Integrated Power Automate for automation of repetitive tasks and real-time notifications.

Future Finder – Python Intern **July2023 – Aug 2023**

Python for automation, real-time logic building & solution development across basic utility projects.

- Learned Python fundamentals including data types, loops, functions, and modules.
- Created mini projects like a voice assistant, pizza ordering system, and calculators.
- Gained hands-on coding experience through real-time logic building and problem-solving.

PROJECTS

SwitchGate 2– Tableau to Power BI Converter: **Feb 2026 – Present**

React | Fluent UI | API Integration | UI/UX Development | API Creation| Backend Development| Python| Migration| LLM | Azure DevOps

Developing a platform to facilitate conversion of Tableau reports to Power BI. Responsible for building the complete frontend UI using React.js and Tailwind CSS, creating responsive and modular components for report interaction and visualization. Integrated APIs to fetch and display structured data, mapping backend responses and local storage values to the interface. Also contributing to the backend development of a report generation agent that processes Tableau report structures and generates corresponding Power BI report configurations. The system is currently deployed and under active development.

SwitchGate – Qlik to Power BI Converter: **April 2025- Nov 2025**

React | Tailwind CSS | API Integration | UI/UX Development | Local Storage Mapping | API Creation

Developing a frontend interface that bridges Qlik data with Power BI visualization needs. Built dynamic React components styled with Tailwind CSS to ensure a responsive and user-friendly design. Developed & Integrated APIs and mapped local storage values to display structured data on the UI. Focused on enhancing usability through clean UX, modular components, and seamless data rendering. Currently deployed and actively under development.

Outclass PTE – AI-Enabled Online PTE Preparation Platform: **Feb 2025 – April 2025**

React | Dataverse | Koyeb | Microsoft Power Platform

Built a responsive PTE learning platform using React, supporting all modules—Speaking, Reading, Writing, and Listening. Integrated Dataverse for structured data storage and used Koyeb to process and store user responses. Questions are fetched dynamically through choice fields, enabling personalized practice and real-time performance tracking.

DocQuery AI – PDF-Based Q&A Chatbot: **Mar 2025- April 2025**

PDF Q&A Chatbot | LLaMA via Ollama | Local RAG | AI Document Reader |Python

Built an intelligent chatbot that allows users to upload PDFs and receive context-aware answers based on the document content. Leveraged **Ollama** to run **OpenAI's LLaMA models locally**, enabling secure, offline processing of user data. Designed to deliver accurate responses by implementing Retrieval-Augmented Generation (RAG) techniques for efficient document comprehension.

EduGen AI – AI-Powered Course Content Generator: **Feb 2025 - Mar2025**

Canvas App | Azure Functions | SharePoint | Microsoft Power Platform

Developed *EduGen AI*, an AI-powered Canvas App that automates course content creation by fetching selected course codes from a website and generating tailored materials. The app integrates Azure Functions for backend processing and stores the generated content in SharePoint. Built on Microsoft Power Platform, the solution streamlines educational content delivery through a clean UI and low-code automation.

Digital Bazaar– E-commerce Platform for Construction Essentials: **Jan 2024 – June 2024**

HTML | CSS | JS | E-commerce | Construction Supplies | UI/UX Focused Platform

Developed a React-based e-commerce website offering a wide range of construction goods, including architecture materials, plumbing items, carpentry tools, and paints. Designed with a user-friendly interface to simplify product browsing and streamline purchasing for contractors and homeowners.

Metric Flow – Employee Leave & Notification Management System: **July 2024 – Oct 2024**

Power Apps | Power Automate |Power Pages

Built an analytical platform leveraging Microsoft Fabric which conducts analysis on seismic data insights by PySpark within Fabric Notebooks. Visualizations have been developed with Power BI embedded in Fabric which integrates real time data sourcing from a government API.

Voice Assistant: **June 2023 – Aug 2023**

Python | SpeechRecognition | pyttsx3 | Automation | Command Handling

Python-based voice assistant using speech recognition and pyttsx3 for speech-to-text and text-to-speech. Automated tasks like opening apps, web searches, and sending emails. Integrated command recognition for a seamless user experience.
